ASSEMBLY AND ADJUSTMENT

PIVOT-PRO Hinges Installation and Parameters

PLANNING

PIVOT-PRO side adjustment

Side adjustment of the door is made by using the indicated screw.

PIVOT-PRO depth adjustment

Depth adjustment is made without loosening any screw. The door can be moved in or out by rotating the cam adjuster on the hinge arm.

PIVOT-PRO height adjustment

By loosening the two fixing screws to allow the mounting plate to slide up or down, the door can be adjusted vertically by $\pm 2\text{mm}$. After retightening the screws, the depth adjustment is done.

Drawer Assembly with Peg

Fix the slide onto the cabinet.

Pull out the drawer member of the slide from the cabinet, lay the drawer onto the slide.

Press the locking pin into the drawer side to lock the position of the drawer.

Removal with Peg

For removal, pull out the locking pin from the drawer side. Lift the drawer and pull it out from the cabinet.

Made in Finland

Huonekalumme valmistetaan Pohjanmaalla, Kurikan Jurvassa. Nykyaikaisessa, pitkälle koneellistetussa tuotannossa työskentelee 30 kalustealan ammattilaista. Periaatteemme on toimia luotettavasti ja kannattavasti. Kehittyminen ja muutos koetaan positiivisesti ja on jatkuvuuden perusehto.

Hiipakka-kalusteiden pääraaka-aine on E1-luokan MFC-kalustelevy (Melamine Faced Chipboard), joka on tarkoitettu käytettäväksi kuivissa sisätiloissa ja on VTT:n hyväksymää. Melamiinipinnoite voidaan pyyhkiä nihkeällä ja on erittäin valonkestävä, joten kaluste pitää hyvin värinsä.

Huonekalumme toimitetaan laatikoihin pakattuna, jotta kuormittaisimme mahdollisimman vähän logistiikkaa. Pakatessa tuoteosat tarkastetaan. Porauksiin jää jonkin verran puupurua ja suosittelemme kalusteen kokoamista pakkauspahvin päällä tai muuten suojatulla alustalla, jotta puru ja muu puupöly on helppo kerätä pois. Kotisi turvallisuuden vuoksi yli 50 cm korkea huonekalu tulee kiinnittää seinään mukana tulevalla nauhalla, joka estää kaatumisen. Koska kotien seinämateriaalit vaihtelevat, jää seinäkiinnitysruuvi/naula asiakkaan hankittavaksi.

Mikäli sinulla on kysyttävää tuotteesta, voit olla yhteydessä suoraan meihin. Kehitämme tuotteitamme jatkuvasti ja olemme kiitollisia kaikesta asiakaspalautteesta. Palaute tulee perille nopeasti kotisivujemme kautta www.hiipakka.net

Den huvudsakliga råvaran i Hiipakkas möbler är MFC-möbelskivor (Melamine Faced Chipboard) av klass E1. Dessa är avsedda att användas i torra utrymmen inomhus och har godkänts av Finlands statliga forskningscentral VTT. Melaminytan kan torkas av med en fuktig trasa och tack vare sin höga ljusbeständighet behåller möbeln färgen väl.

Vi levererar våra möbler omonterade, nedpackade i lådor för att minska transporterna. Produktdelarna kontrolleras i samband med nedpackningen. Det finns alltid kvar lite sågspån i borrhålen och därför rekommenderar vi att du monterar möbeln på förpackningskartongen eller på ett annat skyddat underlag. Då blir det enkelt att städa bort spån och annat trädamm.

Kontakta oss om du har några frågor om en produkt. Vi utvecklar hela tiden våra produkter och är tacksamma för all feedback från våra kunder. Dina kommentarer når oss snabbt via www.hiipakka.net.

**Jos sinulla on ongelmia tai kysyttävää tuotteesta, älä epäröi kysyä meiltä!
